Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-14 are presented for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –
(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Swartz et al., US patent application publication No. 2003/0074463 A1

As to claims 1 and 8, Swartz et al teach an interface device for audiological devices between a plurality of applications [e.g., core NSP systems] and at least one data administration system [e.g., LSPs], comprising:

an application access device [real time interface to core applications 230 in fig. 2] to which the plurality of applications can be connected for uniform data exchange,

a data administration connection device [interfaces to LSPs in fig. 2] to which at least one data administration system can be connected, and

a converter device [e.g., transaction controller in fig. 2], that closes a connection between the application access device and the data administration connection device, the converter device being configured to perform at least one

of: a) converting [e.g., paragraphs 0193, 0194] respectively specific application data acquired by the application access device in a predeterminable databank format for the plurality of applications, and b) converting [e.g., paragraphs 0198] databank data acquired from the data administration connection device into one or more respectively specific application formats for the plurality of applications.

4. As to claims 2 and 9, Swartz et al teach a class library that is accessible with each of the plurality of applications [paragraph 0088].

5. As to claim 3, Swartz et al teach a state administration device for the plurality of applications, such that the plurality of applications have common access to predeterminable data [paragraph 0092].

6. As to claims 4 and 11, Swartz et al teach a databank in which states and data of the plurality of applications can be stored for common access via the state administration device [paragraph 0092].

7. As to claims 5 and 12, Swartz et al teach the state administration device is configured to automatically recognize which data administration system of systems are connected to the device [paragraphs 0151, 0218].

8. As to claims 6 and 13, Swartz et al teach a data keeping device to keep data for a plurality of the applications [e.g., buffer 838: paragraph 0163].

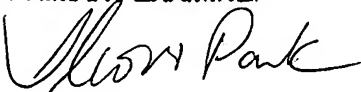

9. As to claims 7 and 14, Swartz et al teach the data device comprises a volatile storage [e.g., buffer 838: paragraph 0163].

10. As to claim 10, Swartz et al teach providing the plurality applications with mutual access to the predeterminable data [paragraph 0208].
